

We are Austria's largest research and technology organisation and an international player in applied research for innovative infrastructure solutions. This makes us a powerful development partner for industry and a top employer in the scientific community. Our **Center for Innovation Systems and Policy** is seeking to hire a new Ingenious Partner for our location in Vienna:

Junior Scientist (m/f/d) for Innovation and Policy Research (initially limited to 2 years)

IMAGINE

- Our *Center for Innovation Systems & Policy* is a think tank in national and international research and innovation networks and it is a key partner for public administration, companies, universities and research institutions.
- As part of our international and interdisciplinary *team* of experts, you will deal with current and future challenges in topics such as research, technology and innovation policy.

ENGAGE

- You will contribute to developing visible projects in a team in close cooperation with national and international customers.
- You will independently apply qualitative and quantitative methods of empirical social research.
- You will prepare research results for decision-makers in politics, business and science.
- You will contribute to the strategic planning and operational implementation of participatory processes.

ACHIEVE

- You will develop concepts for new solutions in the fields of research, technology and innovation policy.
- You will evaluate policy strategies and instruments.
- You successfully acquire projects and make an important contribution to strengthen the relations with our customer and partner networks.

Your qualifications as an **Ingenious Partner***:

- Master's degree in a relevant social, economic or political science, PhD in the field of innovation systems and/or governance research is appreciated
- Strong analytical skills and experience in the design of policy measures, development of strategies and programmes and/or governance of stakeholder processes in the field of research and innovation
- Qualification and experience with interactive formats, e.g. workshops, community platforms, social media
- First project experience in the above-mentioned fields
- Interests in applied research and innovation-oriented projects
- Responsibility, teamwork and communication skills
- Excellent skills in German and English

What to expect:

The minimum gross annual salary according to the collective agreement is EUR 44.478,--. The actual salary will be determined individually, based on your qualifications and experience. In addition, we offer company benefits, flexible working conditions, individual training and career opportunities.

At AIT, the promotion of women is important to us - that's why we are especially looking forward to hearing from female applicants!

TOMORROW TODAY – WITH YOU?
